DETAILED ACTION

Status of Claims

Claims 19 and 21-29 are currently pending.

Claim 1-18 and 20 have been cancelled.

Election/Restrictions

An election was made **without** traverse in the reply filed on 1/14/05 to claims 19 and 21-29, group III.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 19 and 21-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0688854.

EP 0688854 discloses the following structure in page 9, lines 1-14:

EP 0688854 further teaches that a mineral oil may be used (pge 4, line 25). The reference teaches that the method by which the compounds are made (page 9, lines

Art Unit: 1751

19-28). The reference further teaches that materials such as pressure agents, drying agents, acid capture agents, antioxidants, defoaming agents, etc. may be used (page 12, lines 46-58).

The applicant argues that the compositions of the reference and the application are used for different purposes, however the applicant is not claiming that use. The applicant is merely claiming a composition. In response to applicant's argument that his composition is used as a working fluid, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

In view of the forgoing, the above claims have failed to be patently distinguishable over prior art.

The remaining references listed on form(s) 892 and/or 1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the rejection above.

In view of the forgoing, the above claims have failed to be patently distinguishable over prior art.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
